MANAGEMENT

In today's digital landscape, information security has become a critical concern for businesses of all sizes. Enter Hicomply, a pioneering company that's transforming the way organisations approach information security management. Founded in 2019 by Ed Bartlett and Nick Graham, Hicomply has quickly established itself as a leader in the field, offering an innovative Software-as-a-Service (SaaS) platform that simplifies the process of achieving and maintaining crucial information security certifications.

MISSION AND VISION

Hicomply's mission is clear and ambitious: to unlock market access and accelerate business growth through information security. The company envisions a world where all businesses can secure their data effectively, eliminating barriers to entry in new markets or geographies due to lack of customer trust. This vision is realised through Hicomply's software platform, which makes achieving information security certifications simple, fast, and hassle-free.

THE HICOMPLY PLATFORM

At the heart of Hicomply's offering is its cloud-based Information Security Management System (ISMS) software. This comprehensive platform provides

organisations with all the tools needed to effectively manage the end-to-end ISMS process.

Key features include:

- ISMS Governance Management System
- Policy Management and Information Dissemination
- Supply Chain ISMS Compliance Management
- Employee ISMS Training and Compliance Management
- Risk Management and Tracking
- Incident Management and Tracking
- Audit Readiness Engine
- Team Collaboration with Mobile Employee App
- Executive Compliance Dashboards and Reporting
- Controls Monitoring
- ISMS Gap Analysis Tool

The platform is designed to automate and streamline the process of achieving certifications including, but not limited to ISO 27001, SOC 2, GDPR, and NHS DSPT. Hicomply boasts that 90%+ of the work is already done for users, significantly reducing the time and resources required for certification.

CREDENTIALS AND RECOGNITION

Practicing what they preach, Hicomply itself is certified in ISO/IEC 27001, ISO 9001, Cyber Essentials and Cyber Essentials Plus. The company is also an approved supplier of technology to the UK Government through the G-Cloud framework and a member of the UK Cyber Exchange.

LOOKING AHEAD

As businesses increasingly recognise the importance of robust information security practices, Hicomply is well-positioned to lead the way in simplifying and streamlining this critical process. By making information security certification accessible to businesses of all sizes, Hicomply is not just selling a product – it's empowering organisations to protect their data, build trust with customers and unlock new opportunities for growth in an increasingly security-conscious world.

www.hicomply.com

- **Business Growth:** Hicomply's solutions help businesses win tenders and build customer trust, with customers reporting an average 5x ROI.
- **Competitive Advantage:** With a 100% audit pass rate, Hicomply's customers stand out in their respective markets.

LEADERSHIP AND BACKING

Hicomply's success is driven by its experienced leadership team. Co-founders Ed Bartlett and Nick Graham bring a wealth of experience from their backgrounds in healthcare, property and construction SaaS technology businesses. Their first-hand experience with the benefits and challenges of information security certification inspired the creation of Hicomply.

The company's potential has been recognised by BGF, one of Europe's leading technology investors. This backing provides Hicomply with the resources and support to continue innovating and expanding its offerings.

BENEFITS FOR BUSINESSES

Hicomply's approach offers numerous advantages for its clients:

- **Accelerated Certification:** The platform fast-tracks the certification process, allowing businesses to achieve compliance more quickly.
- **Cost Reduction:** By automating many aspects of ISMS, Hicomply helps organisations save on time and resources.
- **Centralised Management:** Multiple certifications can be maintained in one place, simplifying ongoing compliance efforts.
